

FOSKOR (PTY) LTD

REG. NO.: 1951/002918/07

EXPRESSION OF INTEREST

Background

Foskor Richards Bay Division has three Sulphuric Acid Plants based on Monsanto Enviro-chem Technology. Foskor is looking into reducing stack emissions from its sulphuric acid plants as well as optimising the capacity of these plants.

Foskor invites reputable organizations who have expertise and a proven track record of projects that entail impact studies, design, supply and implementation in Sulphuric Acid plants.

Work Description

To conduct a study (with proposals/ recommendations and associated costing) towards reducing stack emissions to comply with new environment regulation and optimising the capacity of its Sulphuric Acid plants.

Reference No.

FT165/10/EM

Interested agencies are required to submit their company's profiles along with comprehensive references of similar projects undertaken worldwide.

Submissions are to be clearly marked as per the following:
